**Roller Screen**

**Vibratory Screen**

**Housing Drum**

**Dry Magnetic Separator**

**Mission Statement:**

Meeting the needs of industry based on knowledge and innovation, production and supply of equipment and providing creative solutions at the global level in the field of mining industry, with adherence to social and environmental responsibilities

**Brand Business Values:**

- Continuous innovation and learning
- Customization in design and engineering
- High efficiency and recovery capacity
- Resource efficiency and emphasis on economic efficiency
- After-sales services
- Supply of equipment and parts with wide commercial access
- Quality and durability
- Speed in fulfilling obligations
- Professional ethics and adherence to

**Commitments:**

Commitment to the environment/Commitment to the customers and their needs/Commitment to colleagues and professional companions

Fakoor Meghnatis Spadana Company **FMS**, as an industrial knowledge-based company, started its activity in 2004 in the field of design, production and supply of mineral processing equipment, granulation, vibration systems and material transfer with the establishment of a factory in Isfahan. The production equipment of this company has met the important and basic needs of mineral processing factories (iron, copper, lead, zinc, etc.), pelletizing, steel and related industries.

In the beginning of its years of activity, this company has been able to record a great variety of products (more than 80 products) in its performance record. Now, with the maturity of the company in the technical, managerial and operational fields, the main focus of production has changed to processing equipment.

Emphasizing on innovative methods, Fakoor Meghnatis Spadana Company **FMS** has been able to develop new equipment every two years and add to its product portfolio. Now, after nearly a decade of the company's proud activity, we have been able to provide more than 70% of the required equipment in the production line of iron ore concentrate and half of the equipment pellet production. We are proud to be introduced as the first and largest designer, manufacturer and supplier of mining equipment and material transfer systems in Iran, with the support of 2 decades of activity. We have now started a new field of cooperation and all-round cooperation with the stakeholders of the mining industry value chain from the top up to the field of steel production with a wealth of valuable experiences.

Backed by valuable experiences in the field of iron industry, the company has now been able to open a new perspective for activities in the non-ferrous fields with the cooperation of European, Chinese and other industrial partners.

**FMS**, with the aim of developing this industry during the years of activity, has been able to offer quality products to the market by using the following items and to guarantee the long-term interests of buyers:

1. Using the latest technology in the world
2. Hiring experienced and specialized engineers
3. Hiring skilled workers
4. Full compliance with environmental laws and regulations
5. Full observance of occupational safety and health laws and regulations
6. To optimize energy consumption

**Products:**

**Processing equipment:** Magnetic Drum Separator /Flotation /Sorter /WHIMS

**Crushing Equipment:** HPGR

**Granulation equipment:** Screen/Roller Screen /Roller Feeder

**Material handling equipment:** Belt Conveyors /Feeder/Belt Feeder/Sampler

**Spare Parts & Service:** Optimization of equipment and process line / Technical and engineering service/Before and after-sales services (repair and maintenance) /Installation /innovating Hybrid iron ore process

**Flotation**

**Wet Magnetic Separator**

**Conveyors**

**Whims**
